

BELZONA® CREATES FLEXIBLE JOINT AT DOORWAY ENTRANCE

CUSTOMER

Shopping Mall
Burnaby, BC

APPLICATION DATE

April 2004

PROBLEM

The outside paving area had been cast separately to the main building foundation and no consideration had been given to the different rates of movement the two slabs would be subjected to. As a result the area was a constant safety and visual concern. Repairs generally involved removing the loose concrete and refilling the gap.

PRODUCTS

Belzona® 2221 MP Fluid Elastomer

SUBSTRATE

Concrete

APPLICATION METHOD

Application carried out in accordance with Belzona® Know-How Leaflet FPA-6

BELZONA FACTS

The Belzona repair is a flexible joint cast between the two surfaces allowing them to move independently of each other.

PHOTOGRAPHS

1. View of problem area.
2. After saw cutting a straight edge along the outer extremities of the crack, the loose and excess concrete was chipped away leaving a channel in which to cast the expansion joint.
3. Completed application.
