
BELZONA® 5811 IMMERSION GRADE PROTECTS COOLING TOWER

CUSTOMER

Property Management
Vancouver, BC

APPLICATION DATE

May 2006

PROBLEM

Excessive corrosion was taking hold of the drip tray area of the cooling tower.

PRODUCTS

Belzona® 5811 Immersion Grade

SUBSTRATE

Steel plate

APPLICATION METHOD

Application carried out in accordance with a modified version of Belzona® Know-How Leaflet HEX - 3

BELZONA FACTS

Coating the wet components of the tower with Belzona 5811 Immersion Grade will ensure that the metal will not deteriorate any further and that the tower will provide trouble free service for years to come.

PHOTOGRAPHS

1. View of drip tray showing dense corrosion
2. Application of 1st coat of Belzona® 5811 after grit blasting the entire base and sides to a near white metal finish (SSPC SP 10) to remove all traces of corrosion.
3. Application of 2nd and final coat
