
BELZONA® PROTECTS MARINE PROPULSION JETS

CUSTOMER
FIRE DEPARTMENT
Vancouver, BC.

APPLICATION DATE

Ongoing since 1996

PROBLEM

Bi-metallic corrosion was a major problem with these high performance marine propulsion jet nozzles despite the attachment of zinc anodes in various locations around the outside of the housing.

PRODUCTS

Belzona® 1341 Supermetalglide

SUBSTRATE

Cast Aluminum

APPLICATION METHOD

Application carried out in accordance with Belzona® Know-How Leaflets CEP-3/4

BELZONA FACTS
