

REDUCE YOUR PUMPS' ELECTRICAL COSTS, INCREASE EFFICIENCY WITH BELZONA

With no end in sight to the rise in electrical costs, it's the perfect time to consider a proven enhancement for pumps which reduces electrical costs and improves efficiency - Belzona® 1341 (Supermetalgilde).

This totally unique system typically provides gains in efficiency - and the reduction in electrical consumption - anywhere from up to 7% on new pumps, and up to 40% on those already in service.

Simply put, the coating of pumps with Belzona® 1341 (Supermetalgilde) can pay for itself in as little as three months* (*at \$.10/ kwh)

Almost every new and used pump can be enhanced with Belzona to reduce its energy costs and improve performance.
